LeetCode

Education

St. Joseph's College of Engineering

B.Tech in Information Technology

CGPA: 7.96/10

2023 – 2027

PSBB Millennium School

Higher Secondary & Secondary Education

HSC: 82%

SSLC: 86%

Technical Skills

Programming Languages: Python, Java, C

Web Technologies: HTML, CSS, JavaScript

Databases: SQL, PostgreSQL

APIs: Gmail API, Twilio WhatsApp API, Gemini API

Libraries: NumPy, Pandas, Matplotlib, Scikit-Learn

Developer Tools: Git, GitHub, VS Code

Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Projects

CineMatch – Movie Recommendation and Analytics System

GitHub

- Built a PostgreSQL-based movie recommendation and analytics system using 100K+ MovieLens ratings across 610 users and 9,742 movies.
- Designed a normalized 3NF relational schema and implemented CTEs, window functions (RANK, LAG), and three recommendation approaches: popularity-based, genre-based, and collaborative filtering.
- Optimized query performance using indexes and views, validating execution plans with EXPLAIN ANALYZE; automated data ingestion and transformation using Python, Pandas, and psycopg2.

AI Interview Preparation Platform

Ongoing

- Developing an AI-powered interview preparation platform with ATS resume analysis, mock interviews, question generation, and candidate performance tracking.
- Integrated Gemini API for personalized question generation and candidate-response evaluation; developing analytics dashboards for performance and skill-gap tracking.

AI Resume Screening System

GitHub

- Developed an ATS-style resume screening system using Python to automatically parse resumes and extract relevant candidate information.
- Implemented skill extraction, keyword matching, and candidate-job matching to rank resumes against job descriptions.
- Automated resume evaluation and ranking to streamline candidate screening and reduce manual review effort.

Gmail to WhatsApp Automation System

GitHub

- Developed a Python-based automation system integrating Gmail API for email retrieval and Twilio WhatsApp API for automated notification delivery.
- Implemented AI-based email classification to identify and prioritize important emails before forwarding them to WhatsApp.

Experience

Qmax Systems India Pvt Ltd

Dec 2025 – Mar 2026

Software Development Intern

- * Developed a Python-based email automation workflow integrating Gmail APIs for email retrieval and automated notification processing.
- * Built a handwritten digit recognition pipeline covering data preprocessing, model training, validation, and testing.
- * Evaluated classification performance using appropriate metrics and analyzed model results to assess prediction quality.

OOR Cabs Pvt Ltd

May 2025 – Jun 2025

Data Analytics Intern

- * Developed Python-based data analysis workflows using Pandas and NumPy to process and analyze operational datasets.
- * Created dashboards and visualizations using Matplotlib to communicate operational trends and support data-driven decisions.
- * Analyzed operational data to identify trends, patterns, and actionable insights for process improvement.

Certifications

- Git for Beginners – KodeKloud (2025)
- Python and Cybersecurity – Udemy (2023)
- Digital 101 – FutureSkills (2024)
